Portfolio

PROFESSIONAL PROFILE

Highly motivated and detail-oriented IT student with strong technical and problem-solving skills. Proficient in a variety of programming languages, including Python, JavaScript, Java, and PHP, with experience in database management, cybersecurity, and various computing skills. Seeking an internship position in the IT industry. Some of the soft skills I possess include problem-solving, communication skills, adaptability, and attention to detail.

EDUCATION

KCA University (2020 > Present)

- ✓ Bachelor of Science in Information Security and Forensics. (Previous GPA 3.10)
- ✓ Have studied and understood concepts in Ethical Hacking, Penetration Testing & Vulnerability Assessment, Machine Learning, Cryptography, Software Development, Networking, Cyber Security, Digital Forensics just to mention but a few.
- ✓ Some of the projects I have done include designing and developing a class attendance web application, a car hire web application, a movie ticket booking web application, an e-commerce mobile application, and many more that can be found on my GitHub page.

Musingu High School

- ✓ Attained a B- (minus) on my Kenya Certificate of Secondary Education.
- ✓ I did Computer Studies and got an A.

PROFESSIONAL EXPERIENCES

LakeHub, Web Design and Developer (2020)

As a web developer, my colleagues and I took on the role of contributing to a highly attractive, responsive web application called Wikonnect. A lot of time was spent working very closely with the designers, actualizing their vision, and making sure the users of the website had a seamless experience. Additionally, I have attended many code reviews and debug sessions, so the identification of mishaps and their fixing happened in parallel with the development.

I had first-hand experience when working with my colleagues. We had regular meetings where we analyzed the project in line with the set milestones and then threw in ideas followed by effective role distribution. We were able to meet the deadlines and deliver the website operating perfectly by ensuring there was improved communication and teamwork.

Remotasks, AI Trainer (2022 > Present)

This experience at Remotasks has not only allowed me to make significant contributions to the field of AI but has also deepened my understanding of the intricate relationship between artificial intelligence and software development. I am excited to continue leveraging my skills to shape the future of coding tools and AI technologies.

With the growing introduction and use of Artificial Intelligence, I had the privilege of assisting Remotasks in providing my services of supervised learning for various Artificial Intelligence organizations. This experience assisted me in gaining some knowledge while dealing with Machine Learning. I also did some data annotation duties such as data labeling, image annotation as well as video annotation.

TECHNICAL SKILLS

- ✓ Ethical Hacking
- ✓ Endpoint Security
- ✓ Vulnerability and Penetration Testing
- ✓ Digital Forensics Tools
- ✓ Encryption Technologies
- ✓ Programming Languages
- ✓ Web Development
- ✓ Database Management
- ✓ Operating System
- ✓ Basic IT Knowledge
